*Providing International Traceability to Measurements in the Country*

A Division of ITDI Under DOST

January 22, 2016

Dr. Jongseon Park  
Center for Calibration and  
Measurement Services  
KRISS

Subject: Endorsement letter for the recalibration of standards by KRISS

Attention: Mr. Hyun Kou, In-charge of Overseas Service Operation

Dear Dr. Park,

The NML wishes to endorse the recalibration of the following standards of the Metals Industry Research & Development Center (MiRDC):

1. Optical Parallel Set
2. Angle Gauge Block Set
3. Metric Gauge Block Set

The NML is currently in the process of re-establishing its capabilities in the Length and Dimensional Metrology and is unable to provide the service to MiRDC at the moment.

It is in this regard that we request that the recalibration service for the Angle and Metric Gauge Block Set be accommodated by KRISS.

I have been informed by Mr. Hyun Kou that KRISS cannot provide the calibration service of the Optical Parallel Set. We will inform MiRDC regarding this.

Thank you.

Truly yours,

Aurora Kimura  
Chief, NML
